

The All New Roulette System

Thank you kindly for your purchase. I hope this proves to be the finest decision you have made. To ensure that it is, I beg you to read this from top to bottom (twice if necessary). I know the excitement you feel is pushing you to flick through this ebook quickly and get started... but I assure you MUST read all of the instructions very carefully.

Before introducing the system, I stress that this system is RISK FREE. This is because online casinos are so desperate for your custom that they are offering huge sign-up bonuses for new players! BUT, this system has not been tried at each and every casino. For this reason, and your convenience, there is a list of casinos and their respective bonus pages here, and at the end of the page. The recommended casinos are in order but feel free to try all of them, they each have their merits!

Casinos for the System

Lucky Ace Casino comes highly recommended. They are the new casino from 888, and are trustworthy, efficient with payouts and the system works great on their software!! The \$400 bonus is an extra special deal that we do not expect to last. Players are eligible for bonuses at both Lucky Ace and Casino on Net (as well as Mansion and Ladbrokes of course).

The System

Now most of you will have played roulette before, and most of you will have lost. Why? Because the casino has the house edge... over the long run it can never be beaten! What we aim to do here is to play a relatively short game and minimise the house edge as much as possible!

Step-by-Step Instructions

- The Roulette table is divided into three sections as shown in the picture below:
LOW – numbers 1-12
MEDIUM – numbers 13-24
HIGH – numbers 25-36

The probability of landing on one section is $12/37 = 32.5\%$

*This means the probability of it not landing on any given section is 67.5% *

Remembering our sections, we now refer to them as L, M and H.

Press SPIN on the roulette wheel (without betting!)

On a blank piece of paper, note the section in which the ball lands (L, M or H)

Press SPIN on the wheel again and note down L, M or H.

Keep doing this throughout the system. Place 0 when the wheel hits zero!

After a while your results will look something similar to H L M M H H M

Example Chart

			5					10				15				20					L	M	H	O
H	M	M	H	L	H	M	M																	
			30					35				40				45								
			55					60				65				70								
			80					85				90				95								

We are waiting for a **critical number** – In other words, a sequence in which one section DOES NOT appear in FIVE consecutive spins. So for example – **L, M, H, H, M, M** (L has not appeared in 5 spins).

When we have our **critical number** we bet on it. So for the example given above, we bet on L.

We bet on L until it wins! To do this we use a special betting pattern, and continue to bet on L up to 11 times – we do not need to go further than this! Use the betting pattern below – **DO NOT STRAY FROM THIS BETTING PATTERN** – and especially do not double up your losing bet. It is vital that you stick to this rule, or the system will not work in the long-run!

Betting Strategy

Bet Number	Stake	Money Earned
1	\$1	+\$2
2	\$2	+\$3
3	\$3	+\$2
4	\$4	+\$2
5	\$6	+\$2
6	\$9	+\$2
7	\$13	+\$1
8	\$20	+\$2
9	\$30	+\$2
10	\$45	+\$2
11	\$67	+\$1

As soon as you win, you must stop betting and continue to write down the sequences until you find the next **critical number**.

Remember – the probability of not landing on one section (let’s say L) is 67.5% or 0.675.

The probability of the ball not landing on one section 11 times? 0.008%

We have conquered the house edge – and with a little patience and discipline, we can start to win regularly! Remember, do not deviate from the betting strategy. The money earned from each spin may seem low but we can get through over a hundred spins in an hour... the money soon rolls in!

NOTES

Please read the following cautions before you play.

Please do not get greedy – stick to the staking plan and you shall earn consistently.

Move around tables every 15 minutes or so – and restart your sequences when you do so. Maybe even change casinos – sometimes the sequences appear to dry up, I've no idea why it is just my experience!

Try to keep a decent sized account balance - \$200 to \$300 is fine. Most of this will be the bonus received by the casino...

As with all gambling, don't play with money you cannot afford to lose. In this case you will be playing with Casino bonuses – but the rule still applies!

Set your daily winnings and stick to it – you can always come back tomorrow if things are slow. You do not want to start diverging from the system because you are frustrated!

So there it is – enjoy your time at the Casino. Now you simply have to pick where you want to play. You can play at a Casino where you are already a member, but you usually must sign up to a new casino if you want to take advantage of BONUS money.

Recommended Casinos and their bonus pages – please click the bonus page link to ensure the bonuses are still available.
